

“Looks like you have a winner here guys”

Captain Jack Molan, Columbia

GLORIA® **HiFlow**

Breaking the "catch 22" of fishing
More catch AND less fuel consumption!

After two years of intense research and development, Hampidjan has delivered four long winged Gloria HiFlow trawls to Alaska. It is designed exclusively for the very unique and particular needs of the Bering Sea Pollock fishery. Patented technology like **Helix** Selfspreading, **Helix** Clamping, Zebra Web and new design are the key elements that make these trawls exceptional in water flow and horizontal opening. After months of fishing, results are very favorable for fishing companies - **the vessels are catching more fish while using less fuel.**

Four Trawls – Four happy skipper's

Captain Ray Haddon, Pacific Explorer:,

"The net fishes good. It outfishes everybody here."

Captain Craig Jenssen, Dominator:,

"My catch rate went up by 25% even up to 100% depending on fishing conditions and my fuel consumption went from 65 gallons/hour down to 52. I was amazed"

Captain Jack Molan, Columbia:,

"I am filling up 30% faster with my new Highflow 1100".

"Looks like you have a winner here guys"

Captain John Wood, American Eagle:,

"I'm really happy with the net. The catch ratio between me and the larger horsepower boats is a lot less than it used to be; they don't outfish me by as much."

Hampidjan USA has two locations of operation.

Hampidjan USA offers Full Service Trawl repair facilities in Seattle, WA & Dutch Harbor, Alaska. The Seattle operation has recently relocated to Pier 91, Seattle.

Both locations are fully stocked with trawl supplies, crane trucks and expert personnel to support the fleet's trawl gear. 24/7 service is available in Dutch Harbor during both A & B seasons.
